<sup>1</sup> All current petrol engines from Porsche are compatible with a fuel ethanol content of up to 10%. The diesel engines are compatible with a biodiesel blend of max. 7%.

<sup>2</sup> The data presented here was recorded using the Euro 5 test procedure (715/2007/EC, 692/2008/EC, 566/2011/EC and ECE-R 101) and the NEDC (New European Driving Cycle). The respective figures were not recorded on individual vehicles and do not constitute part of the offer. This data is provided solely for the purposes of comparison between the respective models. Fuel consumption was recorded on vehicles with standard specification. Optional equipment may affect fuel consumption and vehicle performance. Fuel consumption and CO<sub>2</sub> emissions are not only determined by a vehicle's fuel efficiency, but also by the driving style and other factors irrespective of vehicle specification. For more information on individual models, please contact your Porsche Centre.

<sup>3</sup> In conjunction with the optional 19-inch all-season tyres (optimised for rolling resistance).
